

Welcome

Thank you for your interest towards the proposed Westmoor solar photovoltaic (PV) and Battery Energy Storage System (BESS) project. We hope you find our material interesting and informative.

We have developed these boards and questionnaire to complement the information provided on our website. We are aiming to submit a planning application by the end of June 2025 but, before we do, it's important to listen to the public's views on the proposal so that these can be considered within the ongoing design process. Please take a moment to complete the questionnaire, available on the project website, and provide any comments. Otherwise, please email or write to us to share your feedback: ***developmentuke@abeenergy.com***

Please find the following information on our consultation boards:

- Abei Energy
- Why this site
- Our proposal
- Construction traffic management
- Biodiversity and landscape enhancements
- BESS fire safety
- Outline development programme
